Linear Algebra I Fall Semester 2023 G30 Program, Nagoya University

Please take a copy of Homework 1 and Course information (if you did not take one in the tutorial) Both can also be found on the homepage: https://www.henrikbachmann.com/la1_2023.html

Who is teaching?

What where ?

Most materials can be found here: https://www.henrikbachmann.com/la1_2023.html

- Lecture notes: Contains the content of the lecture and additional examples/remarks/proofs.
- Handwritten notes: The notes I use for the lecture
- Tutorial notes: The notes we create during the tutorial
- **Homework:** The homework assignments. Need to be submitted in NUCT.
- Lecture notes (2020): Handwritten lecture notes from 2020
- Lecture videos (2020): Recorded lectures from 2020

I encourage everyone to take their own notes

When do we meet? What to do?

What you should do:

(Sunday 23:55)

- Join the Lectures **and / or** watch the recordings of the Lectures
- If you just watch the videos of 2020 please also check the lecture notes of this year.
- Attend the Tutorial each Tuesday 13:00-13:40. There we will discuss the content of the previous week and the homework.
- Submit Homework at TACT (around every two weeks)

If you have any questions I am always open for office hours (Zoom or in my office)

Grading & Exams

Your grade for the course "Linear Algebra I" and "Mathematics Tutorial 1b" will be the same. This grade will be calculated as follows:

Homework:30%Roughly every second week
2-3 ExercisesMidterm exam:30%17th November 2023 in the lectureFinal exam:40%2nd February 2024 in the lecture

The grading scale will be A+, A, B, C, C-, F.

For those just taking Linear Algebra I:

You can choose to also do the homework and use the same grading above. Or you can choose to just write the midterm (40%) and final exam (60%).

Homework

- Announcements
- Resources
- Assignments
- ✓ Tests & Quizzes
- Gradebook
- Site Info
- Class Evaluation Qu...
- Messages

- Write the homework solutions down by hand (paper, tablet) or by computer (Latex; contact me if you want to learn it!).
- Create <u>one</u> pdf file which contains your solution. For this you can, for example, use a scanner app on your phone.
- Use the following format as a filename:
 "Familyname_Givenname_LA1_HWX.pdf", where X = Homework number.
- Please make sure that the solutions are readable and do not need to be turned by 90 degrees.
- Submit the Homework in TACT. Resubmissions are always possible.

Other references?

There are tons of sources out there for Linear Algebra 1.

This course is based on the book "Linear Algebra with Applications" by Otto Bretscher.
